

12th COSME Week TOKYO will be held from Jan. 12 (Wed) to 14(Fri) as scheduled

Thank you for your continuous support of the exhibitions.

We will hold COSME Week [TOKYO] as scheduled from January 12 – 14, 2022 at Tokyo Big Sight. The exhibition will be held while following the guidelines for Covid-19 control measures of the government, municipalities, and the exhibition industry to ensure the exhibitors' and visitors' safety. For more information on the control measures, please refer to the official website of the exhibition.

As a fair organiser, Reed Exhibitions Japan has been hosting exhibitions over 35 years, all on the schedule based on the belief that "Exhibitions, in principle, should be held as scheduled under any circumstances." It is because exhibitions have the following features.

- Exhibitions, in principle, should be held regularly at the same time and place each year.
- Since exhibitions are a "business place" where business discussions worth billions upon billions of yen are held, they are indispensable for exhibitors and visitors alike.
- Exhibitors start preparing some six months before the exhibition, whilst visitors also begin making appointments with exhibitors and seminar applications.
- Exhibitions bring huge economic benefits to the host cities every year in terms of accommodation, transportation, food and beverage, and therefore have the nature of public infrastructure.

We will continue to follow this principle and hold all exhibitions as scheduled.

Nevertheless, if a state of emergency is declared and the government requests the event to be cancelled, the organiser shall decide to hold, postpone or cancel the exhibition.

Economic activities have been stagnant due to Covid-19. We are determined to contribute to accelerating and developing the industry through this exhibition and sincerely appreciate your continued support and cooperation.
