

2nd COSME Week OSAKA will be held from Sep. 29 (Wed) to Oct. 1 (Fri) as scheduled

Thank you for your continuous support of the exhibitions.

Recently, Osaka Governor Yoshimura announced that Hall 6 of INTEX Osaka would be used as a temporary patient care facility. Osaka Prefecture has explained the following measures to be taken, and we report that the exhibition will be held without interruption for the following reasons.

- INTEX Osaka Hall 1 -5 can use as an exhibition as usual, safely and securely.
- A wall will separate the patient care facility in Hall 6 from the exhibition hall.
- The exhibition and patient care facilities can be managed separately, not to connect at all.

Since the temporary patient care facility is supposed to be "a facility that can respond quickly in the case of a disaster-grade infection explosion," accepting patients during the exhibition is not expected at this stage, as the number of infected people is decreasing.

The exhibition will be held while following the guidelines for Covid-19 control measures of the government, municipalities, and the exhibition industry to ensure the exhibitors' and visitors' safety. For more information on the control measures, please refer to the official website of the exhibition.

Economic activities have been stagnant due to Covid-19. We are determined to contribute to accelerating and developing the industry through these exhibitions and sincerely appreciate your continued support and cooperation.
